Medical Transport (Primary) | Community Rideshare (Secondary) | Tesla Cybercab Platform

TSBDC SESSION GUIDE — What to Cover

Purpose: Review VyDrive's business model, validate financial projections, explore SBA and grant options, and identify local investors and contract opportunities.

Key positioning: VyDrive is a community health and mobility asset — not a liability. Every design decision in this plan is built around safety, trust, and serving Clarksville's most vulnerable riders.

Key changes from prior draft: Fort Campbell removed. Medical ecosystem expanded to include dialysis, oncology, senior transport with eligibility screening, and city/county contracts. Rideshare repositioned as community-first, flat-rate service.

Ask advisor:

- (1) Do projections look realistic?
- (2) What grants apply?
- (3) SBA 504 for hub equipment?
- (4) TVA rebates?
- (5) Attorney and investor referrals?

1 Business Overview

Company Name	VyDrive LLC
Website	vydrive.com
Location	Clarksville, Tennessee
Founder	Narayan Rabindranath 615-428-7313 narayan.rabindranath@gmail.com
Entity Type	Limited Liability Company (Tennessee) — formation in progress
Stage	Pre-revenue — entity formation and seed round in progress
Industry	Autonomous EV Fleet / Medical Transport / NEMT / Community Rideshare
Primary Revenue	Hospital discharge transport + recurring medical NEMT contracts
Secondary Revenue	Dialysis, oncology, senior transport — scheduled recurring rides
Tertiary Revenue	City/county contracted transport + workforce shift rides
Quaternary Revenue	Community rideshare / taxi — on-demand, off-peak, flat-rate
TennCare (Year 2)	Direct Medicaid NEMT billing — enrolled as TennCare transportation provider
Vehicle Platform	Tesla Cybercab — 10 vehicles Phase 1 @ \$30,000/unit

VyDrive is an autonomous electric fleet company built around one mission: dependable, dignified, affordable transportation for Clarksville's medical community and general public. We deploy Tesla Cybercabs on contracted service agreements with hospitals, medical treatment centers, senior organizations, and city agencies — and make those same vehicles available to the public during off-peak hours as a flat-rate community rideshare service.

VyDrive is not positioned as a technology experiment or a liability risk. It is positioned as a trusted community infrastructure partner — the same way a medical courier, a pharmacy delivery service, or a hospital shuttle is viewed. Every rider eligibility policy, insurance layer, and compliance framework in this plan exists to reinforce that positioning with investors, partners, and the public.

2

The Market Opportunity — Clarksville's Transportation Gap

Clarksville, Tennessee is a city of 175,000+ people growing at 3% annually — and it has a transportation infrastructure that has not kept pace. Ride-share coverage is thin and unreliable. The public bus system (CTS) stops at 6 PM on weekdays and does not run Sundays. Thousands of residents — patients, seniors, shift workers, and families — have no reliable, affordable ride option. VyDrive is built to fill that gap.

The Medical Transportation Crisis

- \$150 billion is lost annually in U.S. healthcare due to missed appointments — transportation is the #1 cited cause
- Hospitals face CMS financial penalties for 30-day readmissions — a patient discharged without a safe ride home who returns to the ER is a costly readmission
- Federal SDOH requirements now mandate hospitals document patient transportation barriers and what they did about them — VyDrive is a direct, documented answer
- Dialysis patients attend treatment 3 times per week, every week, for years — and most cannot drive themselves
- Chemotherapy and radiation patients require regular transport to treatment during periods when they cannot safely drive
- Discharge delays cost hospitals thousands per hour in occupied beds — a patient waiting for a ride is a bed that cannot turn over

The Senior Transportation Gap

- Clarksville's senior population is large and growing — many are medically stable but no longer drive
- Family caregivers are often unavailable during the work week — leaving seniors stranded for routine appointments and errands
- Existing paratransit options are chronically underserved and require advance booking up to 72 hours ahead
- VyDrive serves eligible seniors — those who are cognitively intact and physically able to ride independently — providing same-day, on-demand transport with no advance booking required

The Community Rideshare Gap

- Uber and Lyft coverage in Clarksville is inconsistent — driver shortages, long waits, and surge pricing are common complaints
- CTS bus service ends at 6 PM weekdays, no Sunday service — leaving shift workers, service industry employees, and late-night riders with no option
- No flat-rate, no-surge rideshare option exists in Clarksville — VyDrive owns that positioning
- Austin Peay State University (10,000+ students) generates consistent demand for affordable rides between campus, downtown, and the Wilma Rudolph corridor

3

Trust & Safety — Why VyDrive Is Not a Liability

This section exists because every investor, hospital administrator, and city official will ask some version of the same question: 'What happens when something goes wrong?' VyDrive's answer is built into the design of the business — not bolted on as an afterthought.

Rider Eligibility Framework

VyDrive does not transport every person who calls. For medical and senior riders, a simple eligibility screening ensures every passenger is appropriate for unassisted autonomous transport.

Eligible riders: Cognitively intact — able to understand destination and communicate if needed. Physically mobile enough to enter and exit unassisted. Medically stable — no active monitoring required during transport. Able to use a seatbelt independently. Has a reachable emergency contact.

Not eligible for unassisted VyDrive: Dementia or significant cognitive impairment. Requires wheelchair lift or physical transfer assistance. Needs active medical monitoring during transport (oxygen, IV, post-procedure). Non-verbal or unable to communicate distress.

For riders needing a companion: VyDrive partners with Clarksville-area home health agencies. They provide a companion aide who rides along — VyDrive provides the vehicle, the agency provides the human support. Same vehicle, same reliability, added care.

How Eligibility Is Confirmed

- Hospital/clinic referrals: Discharging nurse or social worker confirms patient is stable for unassisted autonomous transport — one checkbox added to their existing discharge process
- Self-certification: Rider or family member signs a simple one-page form confirming eligibility criteria — VyDrive is not making a medical judgment
- Agency referrals: When a senior agency or dialysis center refers a rider, a staff member confirms eligibility on their end as part of the referral
- Recurring riders: Once a rider is screened and cleared, they ride without re-screening unless their condition changes

Safety Systems in Every Vehicle

- Tesla FSD platform — commercial-grade autonomous driving with continuous monitoring and remote override capability
- Two-way intercom — rider can communicate with VyDrive's operations center at any time during a ride
- Emergency stop button — rider-accessible in-cabin
- Real-time GPS tracking — every ride logged with timestamps, route, and rider ID
- 24/7 remote operations monitoring — hub managers on-call rotation
- Automatic 911 integration — system triggers emergency services if vehicle detects an incident

Insurance — Fully Layered Protection

Coverage	Limit	Purpose
Commercial Auto Liability	\$1,000,000/occurrence	Vehicle accidents — required by all hospital vendor agreements

General Liability	\$1M / \$2M aggregate	Slip/fall, property damage — standard vendor requirement
Umbrella / Excess Liability	\$5,000,000	Required by hospital legal teams for any patient-facing vendor
HIPAA Cyber Liability	\$1,000,000	Patient data — required for any HIPAA Business Associate
For-Hire Passenger Endorsement	Included in auto policy	Covers public rideshare passengers
Workers' Compensation	Per TN law	Required upon first hire
AV Technology Liability	\$1,000,000	Autonomous system failures
TOTAL ESTIMATED	\$40,200–\$66,000/yr	Comprehensive protection for all rider categories

The liability framing: VyDrive carries more insurance per vehicle than any taxi company or ride-share driver operating in Clarksville today. The eligibility framework means VyDrive never transports a rider who is not appropriate for the service. That combination — rigorous screening plus comprehensive coverage — makes VyDrive one of the safest medical transport vendors in the market.

4 Revenue Streams — Five Channels, One Fleet

VyDrive operates five revenue streams in deliberate priority order. Every stream uses the same vehicles. Contracted medical revenue anchors the business. Community rideshare fills idle time. No stream competes with another.

S1 STREAM 1 — Hospital Discharge & NEMT Contracts (PRIMARY)

Monthly flat-fee contracts with hospitals for dedicated patient discharge transport and medical appointment rides. HIPAA-compliant, fully documented, and directly addresses hospital SDOH reporting requirements.

- Target clients: Tennova Healthcare (280+ beds), Gateway Medical Center
- Pricing: \$4,500–\$4,800/vehicle/month per contracted vehicle
- Contract entry point: Director of Case Management / Discharge Planning — not CEO or procurement
- Contract length: 12 months minimum, auto-renew, 3% annual escalator
- HIPAA Business Associate Agreement signed with each hospital before first ride
- Every ride generates a timestamped, encrypted ride record for hospital's SDOH compliance documentation

S2 STREAM 2 — Recurring Medical Treatment Transport (HIGH VALUE)

Dialysis and oncology patients are the most underserved, highest-frequency riders in any city. VyDrive contracts directly with treatment centers to provide scheduled, recurring transport — the same vehicle at the same time, on the same days, every week.

- Dialysis centers: DaVita and Fresenius clinics in Clarksville — patients attend 3x/week, 52 weeks/year
- Oncology / chemotherapy: Tennova Cancer Center — patients on multi-week treatment schedules
- Radiation therapy: recurring daily appointments over 4–8 week treatment cycles
- Pricing: \$35–\$55/ride directly billed to treatment center, patient insurer, or TennCare
- Schedule-based dispatch — rides are pre-booked, routes are predictable, vehicles are utilized efficiently
- This stream feeds directly into TennCare NEMT billing in Year 2 — same rides, Medicaid pays

S3 STREAM 3 — Senior & Eligible Disability Transport (CONTRACTED)

VyDrive serves seniors and riders with disabilities who meet the eligibility criteria in Section 3. This is not a free-for-all senior service — it is a screened, contracted service that positions VyDrive as a trustworthy partner to senior organizations and state agencies.

- Tennessee Commission on Aging and Disability — (615) 741-2056 — state agency that funds and coordinates senior transportation contracts
- Clarksville Area Senior Center — (931) 645-7128 — direct pipeline to eligible senior riders
- Area Agency on Aging — contracts transportation vendors to serve seniors; VyDrive can become an approved provider
- Home health agency partnerships — for seniors needing a companion aide, partner agency provides the human; VyDrive provides the vehicle
- Pricing: \$28–\$45/ride or monthly flat-rate contract with referring agency
- Eligibility screening: self-certification form or referring agency confirmation — see Section 3

S4 STREAM 4 — City / County / Workforce Contracts (INSTITUTIONAL)

Local government and large employers represent low-glamour but high-durability contract revenue. These clients are motivated by cost reduction and reliability — not innovation. VyDrive's pitch to them is simple: we are cheaper than a motor pool and more reliable than a driver.

- City of Clarksville — fleet operations; Mayor's Office → fleet/transportation contact → (931) 645-7444
- Montgomery County Government — Purchasing Office → register as vendor → (931) 648-5787
- Workforce / shift workers — Clarksville manufacturing and warehouse employers (LG Electronics, Hankook Tire, Google Data Center) need shift-start and shift-end transport at hours when no ride-share exists
- Austin Peay State University — student transport between campus, downtown, and Wilma Rudolph corridor; potential institutional contract
- Pricing: \$5,000–\$5,200/vehicle/month for city/county contracts; \$18–\$25/ride for workforce shift transport
- Contract length: 24–36 months typical for government; shift transport contracts 12 months minimum

S5 STREAM 5 — COMMUNITY RIDESHARE / TAXI (OFF-PEAK, FLAT-RATE)

VyDrive makes the same vehicles available to the general public during off-peak hours — evenings, weekends, and early mornings when contracted rides are not active. No surge pricing. No mystery fares. A flat-rate zone system that Clarksville can depend on.

- Service hours: evenings 6 PM–midnight, weekends, early mornings 5–7 AM
- Pricing: flat-rate zone system — example: downtown to Wilma Rudolph = \$12, Clarksville to BNA Nashville = \$85
- Dispatched via VyDrive app (iOS/Android) and phone dispatch line — serves both smartphone and non-smartphone riders
- High-demand routes: Nashville airport runs, APSU campus rides, late-night bar corridor (Franklin Street downtown), event transport
- No surge pricing — ever. This is a brand promise and a competitive differentiator
- Every rideshare ride is a VyDrive brand impression — building community trust and repeat usage

Priority rule: Contracted medical rides always come first. Rideshare activates only during pre-defined off-peak windows. Fleet management software enforces this automatically — a rideshare call never pulls a vehicle from a medical contract window.

5 Target Clients & Contract Opportunities

Client	Type	Contract Value	Priority	Entry Contact
Tennova Healthcare	Hospital discharge + NEMT	\$4,500–\$4,800/vehicle/mo	Week 1	Director, Case Management — (931) 502-1000
Gateway Medical Center	Hospital discharge — pilot	\$4,500/vehicle/mo	Week 1	Director, Case Management — call main line
DaVita Dialysis — Clarksville	Dialysis transport 3x/week	\$35–\$55/ride or flat contract	Week 2	Center Manager — search DaVita.com/find-a-center
Fresenius Kidney Care	Dialysis transport 3x/week	\$35–\$55/ride or flat contract	Week 2	Center Manager — search FreseniusKidneyCare.com
Tennova Cancer Center	Oncology/chemo transport	Per-ride or monthly contract	Month 2	Oncology Nurse Navigator
Clarksville Area Senior Center	Senior eligible transport	\$28–\$45/ride or agency contract	Month 2	Executive Director — (931) 645-7128
TN Commission on Aging	State senior transport funding	State contract / grant	Month 2	(615) 741-2056
City of Clarksville	Government fleet contract	\$5,000–\$5,200/vehicle/mo	Month 3	Mayor's Office → (931) 645-7444
Montgomery County	Government fleet contract	\$5,000/vehicle/mo	Month 3	Purchasing Director — (931) 648-5787
LG Electronics / Hankook Tire	Workforce shift transport	\$18–\$25/ride or flat contract	Month 4	HR / Operations Manager
Austin Peay State University	Student transport contract	Flat monthly or per-ride	Month 4	VP Student Affairs — apsu.edu
General Public Rideshare	Community rideshare — app + phone	Per-ride, flat-rate zone pricing	Month 6	VyDrive app launch

6

Tesla Cybercab Fleet — Costs & Network Model

Vehicle: Tesla Cybercab — purpose-built autonomous electric cab, \$30,000/unit

Phase 1 fleet: 10 vehicles = \$300,000 total acquisition — 80% cheaper than traditional medical transport vehicles (\$60K–\$150K each)

Tesla Network Fee: ~30% of gross contracted revenue — covers FSD autonomous software, OTA updates, dispatch, and Tesla service network

Key insight: No driver cost. No fuel cost. Lower maintenance than any combustion vehicle. Even after the 30% Tesla fee, VyDrive's net margin per ride exceeds any driver-dependent operator.

Tesla Fleet contact: 1-888-518-3752 | fleet@tesla.com — register VyDrive as a commercial operator now

Fleet Cost Item	Per Vehicle / Month	10 Vehicles / Month	Annual (10 vehicles)
Tesla Network Fee (30% of contracted gross)	~\$1,460 avg	~\$14,600	~\$175,000 (Yr 1)
Electricity — charging	\$300	\$3,000	\$36,000
Maintenance estimate	\$200	\$2,000	\$24,000
Insurance — fleet allocation	\$350	\$3,500	\$42,000
Hub allocation (ops + rent share)	\$293	\$2,930	\$35,160
TOTAL fleet operating cost	~\$2,603	~\$26,030	~\$312,160

7 Hub Infrastructure — Full Cost Breakdown

Hub 1 location: Potential site identified — Clarksville, TN. \$500/month rent. Near hospital corridor.

Hub 2 location: Downtown / government district corridor. Site TBD. Budgeted identically.

Purpose: Each hub: 5–6 vehicles, Level 2 charging, operations coordination, 24/7 remote monitoring.

Section 7A — Charging Equipment & Installation (Per Hub)

Item	Unit Cost	Qty	Total	Notes
Tesla Wall Connector Gen 3 — Hardware	\$475	6	\$2,850	Level 2 charger; native Tesla Fleet integration
Mounting hardware & conduit per unit	\$150	6	\$900	Wall anchors, conduit, junction boxes
Electrical sub-panel upgrade (200A→400A)	\$3,500	1	\$3,500	Required to run 6 simultaneous chargers
Circuit wiring — dedicated run per charger	\$600	6	\$3,600	Electrician materials + labor; 15–25 ft avg run
Licensed electrician installation per unit	\$350	6	\$2,100	~2 hrs per charger; mount, wire, commission
SUBTOTAL — Charging Equipment			\$12,950	Per hub

Section 7B — Permits: Clarksville / Montgomery County

Permit	Authority	Est. Fee	Timeline
Electrical — sub-panel upgrade	City of Clarksville Building & Codes — (931) 645-7444	\$150–\$250	5–10 business days
Electrical — EV charger circuits (6)	City of Clarksville Building & Codes	\$75–\$150 (often bundled)	5–10 business days
City business license	City of Clarksville Finance Dept.	\$15–\$50/yr	Immediate online
Montgomery County business license	Montgomery County Clerk	\$15/yr	Immediate
TN Business Tax registration	TN Dept. of Revenue — tntap.tn.gov	Free	Immediate online
Sign permit (if exterior signage)	City of Clarksville Building & Codes	\$50–\$150	5–7 business days
TNC registration (rideshare)	TN Dept. of Safety & Homeland Security	\$500/yr	2–4 weeks
City for-hire vehicle permit	Clarksville City Clerk	\$50–\$200/yr per vehicle	1–2 weeks
PERMIT TOTAL (estimated)		\$855–\$1,315	Confirm fees at (931) 645-7444

Electrician tip: Your licensed electrician pulls electrical permits as part of their scope. Confirm this when getting installation quotes — you should not file electrical permits yourself.

Section 7C — Hub 1 Monthly Operating Costs

Monthly Cost Item	Monthly	Annual	Notes
Rent	\$500	\$6,000	Identified potential location
Electricity — vehicle charging (5 vehicles)	\$600	\$7,200	\$0.12/kWh TVA commercial rate
Electricity — facility operations	\$150	\$1,800	Lights, HVAC, small office
Internet / fleet monitoring	\$80	\$960	Tesla Fleet Management connectivity
Hub Manager labor allocation	\$1,500	\$18,000	Shared Hub 1 + Hub 2
Supplies, cleaning, misc.	\$100	\$1,200	
TOTAL — Hub 1 Monthly	\$2,930	\$35,160	

Section 7D — Hub 1 Total One-Time Build-Out

Category	Cost	Notes
Charging equipment & installation	\$12,950	See Section 7A
Permits (electrical + business + TNC)	\$1,000	Midpoint estimate; confirm with city
Operations setup (signage, furniture, supplies)	\$2,500	Basic hub setup
Security camera system (4-camera IP)	\$1,200	Fleet and premises monitoring
First month rent + security deposit	\$1,500	\$500 × 3 months (first, last, security)
Contingency — 10%	\$1,915	Buffer for unexpected costs
HUB 1 TOTAL BUILD-OUT	\$21,065	One-time capital to go operational
HUB 2 TOTAL BUILD-OUT (identical spec)	\$21,065	Adjust when site confirmed
BOTH HUBS COMBINED	\$42,130	Full infrastructure capital requirement

TVA incentive: TVA offers commercial EV charging infrastructure rebates — potentially \$5,000–\$15,000 toward hub build-out. Ask TSBDC advisor whether VyDrive qualifies.

SBA 504 question: Does the sub-panel upgrade and charger installation qualify as 'equipment' under SBA 504 (10-year fixed rate)? This could finance hub build-out separately from working capital.

8 Financial Projections — 3 Year Summary

	Year 1	Year 2	Year 3
Fleet Size	10 vehicles	16 vehicles	20 vehicles
Hospital / NEMT Contract Revenue	\$388,800	\$1,296,000	\$2,592,000
Dialysis + Oncology Transport Revenue	\$72,000	\$180,000	\$360,000
Senior + Disability Transport Revenue	\$36,000	\$120,000	\$240,000
City / County / Workforce Contracts	\$86,400	\$252,000	\$480,000
Community Rideshare / Taxi Revenue	\$93,440	\$197,100	\$438,000
TennCare NEMT Billing (Year 2+)	\$0	\$200,000	\$330,000
GROSS REVENUE	\$676,640	\$2,245,100	\$4,440,000
Tesla Network Fee — 30% (contracted revenue)	(\$174,960)	(\$548,400)	(\$1,274,400)
Rideshare Licensing & TNC Fees	(\$8,500)	(\$12,000)	(\$18,000)
NET REVENUE	\$493,180	\$1,684,700	\$3,147,600
Total Operating Costs	(\$505,000)	(\$780,000)	(\$980,000)
EBITDA	(\$11,820)	\$904,700	\$2,167,600
EBITDA Margin	—	39%	49%
Cumulative Cash	(\$11,820)	\$892,880	\$3,060,480

Note: Tesla Network Fee applies to contracted ride revenue only. Rideshare revenue carries its own per-ride platform and licensing cost shown separately. Break-even projected Month 10–12.

Key Assumptions

- Tesla Cybercab at \$30,000/unit — confirm commercial pricing with Tesla Fleet: 1-888-518-3752
- Tesla Network Fee at 30% — to be confirmed in commercial operator agreement
- Hospital contracts: \$4,500–\$4,800/vehicle/month based on comparable NEMT contract rates nationally
- Dialysis transport: 3 rides/patient/week × 20 active patients × \$40/ride avg = \$72,000/year at 10 vehicles
- Senior transport: conservative 2 rides/day on 1 dedicated vehicle @ \$32 avg = \$36,000/year
- Community rideshare: 8 rides/day on 2 off-peak vehicles @ \$16 avg = \$93,440/year (conservative)
- TennCare NEMT billing begins Month 15 — enrollment started Month 9
- Hub rent at \$500/month per hub — based on identified potential location
- All contracts carry 3% annual pricing escalator

9 Use of Funds — \$1,400,000 Seed Round

Use of Funds	Amount	% of Raise	Detail
Tesla Cybercab — 10 vehicles @ \$30,000	\$300,000	21.4%	Phase 1 fleet acquisition
Tesla Network Onboarding & Year 1 Access	\$120,000	8.6%	Commercial operator enrollment + platform fees
Hub 1 Build-Out — full (Section 7D)	\$21,065	1.5%	Chargers, install, permits, setup, deposit
Hub 2 Build-Out — full (Section 7D)	\$21,065	1.5%	Identical spec; site TBD
Hub 1 Annual Operating Reserve (12 months)	\$35,160	2.5%	Rent \$6K + electricity + internet + ops
Hub 2 Annual Operating Reserve (12 months)	\$35,160	2.5%	Rent \$6K + electricity + internet + ops
Rideshare App & Dispatch Platform	\$40,000	2.9%	White-label app license + phone dispatch setup
TNC & For-Hire Licensing (state + city)	\$5,000	0.4%	TNC registration, city permits, vehicle inspections
Fleet Mgmt & HIPAA Dispatch Software	\$80,000	5.7%	Annual license + HIPAA-compliant implementation
Insurance Package — full Year 1	\$125,000	8.9%	Auto, liability, umbrella, HIPAA cyber, for-hire
Legal, Licensing & Compliance	\$60,000	4.3%	Attorney, SAM.gov, permits, BAA templates, eligibility docs
Sales & Medical/Community Outreach	\$100,000	7.1%	Contract development, hospital outreach, marketing
Working Capital Reserve	\$457,550	32.7%	18-month operating buffer during ramp-up
TOTAL RAISE	\$1,400,000	100%	

10 Compliance Overview

Hospital / Medical NEMT Compliance

- HIPAA Business Associate — VyDrive signs a BAA with each hospital and medical client; dispatch software is HIPAA-compliant with encrypted storage and audit logging
- Rider Eligibility Framework — documented screening process for medical and senior riders (see Section 3)
- SDOH documentation — every ride generates a timestamped, encrypted record usable for hospital SDOH reporting
- TennCare NEMT enrollment (Year 2) — Bureau of TennCare Provider Services: (800) 852-2683 | tn.gov/tenncare

Rideshare / Taxi Compliance

- TNC registration — Tennessee Dept. of Safety & Homeland Security — \$500/yr — contact (615) 251-5166 for AV fleet guidance
- City for-hire vehicle permit — Clarksville City Clerk — \$50–\$200/yr per vehicle
- Annual vehicle inspection — TN commercial vehicle inspection, \$20–\$50/vehicle
- For-hire insurance endorsement — added to commercial auto policy, est. +\$3,000–\$6,000/yr
- ADA compliance plan — 20% of fleet accessible OR equivalent access documentation

Senior Transport Compliance

- Rider eligibility screening — self-certification or referring agency sign-off (see Section 3)
- Home health agency partnership agreements — for riders needing companion aide
- Tennessee Commission on Aging and Disability vendor registration — (615) 741-2056
- Area Agency on Aging approved provider enrollment

11 Go-To-Market Strategy

Phase 1 — Hospital Contracts (Months 1–6)

Entry point: Director of Case Management / Discharge Planning. This person owns the discharge transport problem daily. They are VyDrive's internal champion at every hospital.

One-sentence pitch: "VyDrive provides your hospital a dedicated autonomous electric vehicle for patient discharge — reducing readmission risk, clearing bed bottlenecks, and documenting every ride for SDOH reporting, at a flat monthly fee with no driver liability on your end."

- Tennova Healthcare: (931) 502-1000 — call to get Director of Case Management name and email
- Gateway Medical Center: Smaller hospital, more flexible — ideal first pilot contract signature

Phase 2 — Recurring Medical Treatment Contracts (Months 2–6)

- DaVita Dialysis — search DaVita.com for Clarksville locations; call Center Manager directly
- Fresenius Kidney Care — search FreseniusKidneyCare.com for Clarksville locations; same approach
- Tennova Cancer Center — contact Oncology Nurse Navigator for chemo/radiation transport partnership
- Pitch: 'We eliminate your patients' #1 barrier to keeping appointments — guaranteed, scheduled, flat-rate'

Phase 3 — Senior & Community Contracts (Months 3–6)

- Tennessee Commission on Aging — (615) 741-2056 — register as transportation vendor
- Clarksville Area Senior Center — (931) 645-7128 — partnership referral pipeline
- City of Clarksville — Mayor's Office → (931) 645-7444 — fleet/transportation contact
- Montgomery County Purchasing — (931) 648-5787 — register as approved vendor

Phase 4 — Rideshare Launch (Month 6–9)

- Launch after first hospital contract is live — operational credibility before public-facing complexity
- Marketing: VyDrive-branded vehicle wraps, QR codes at hospital discharge lobbies, senior center flyers, APSU campus signage
- App launch + phone dispatch simultaneously — serves smartphone and non-smartphone riders
- Flat-rate zone pricing published publicly — no surprises, no surge, ever

Key Contacts — All Streams

Questions for Dave Dessauer — TSBDC Advisor

- Q1:** Do these financial projections look realistic for a 5-stream medical and community fleet business?
- Q2:** Are there Tennessee or federal grants for EV fleet operators, NEMT providers, or senior transportation services?
- Q3:** Does hub sub-panel upgrade and charger installation qualify as equipment under an SBA 504 loan?
- Q4:** What SBA 7(a) or 504 program best fits \$420,000 in vehicle + hub acquisition?
- Q5:** Are there TVA rebates for commercial EV charging infrastructure in Clarksville?
- Q6:** How do I become an approved vendor for the Tennessee Commission on Aging transportation program?
- Q7:** Who in your investor network focuses on medical transport, NEMT, or community mobility businesses?
- Q8:** What Clarksville attorneys do you recommend for LLC operating agreements, hospital BAAs, and elder care service contracts?
- Q9:** Does Clarksville have any additional local ordinances for rideshare beyond state TNC registration?
- Q10:** Is there anything in this plan that concerns you or that I should address before approaching investors?
